There is unfortunately no DMG file to download on the Shrew website (Shrew Soft Inc : DOWNLOAD > VPN Client For Linux and BSD).. 3 1 I'm having an issue with the ShrewSoft VPN Client using XAuth to RADIUS (securid) In the VPN Definition for XAuth you have to use remote identities, does this mean you have to create all the users that will be using RSA token's.. My company uses Shrew VPN and I am trying to install it on my MacBook Air so that I can work from home when needed.

I've been trying to install Shrew VPN on my MacBook Air, but I am not succeeding.. Has anyone recently installed Shrew VPN on their MacBook and is willing to give me step by step instructions on how to install it? I am not a tech wiz, but I am also not a complete fool.. I have a vpn file that I use on Windows with the Shrew Soft VPN Client that has the connection details (excluding the username and password).. Vpn Access Manager ShrewVpn Shrew SoftShrewSoft VPN Client and RSA Securid (RADIUS and XAuth) with MFE v8.. Instead there is a GZIP and BZIP file I've downloaded these and extracted them and then followed online instructions to install Shrew VPN using these files, but still no success.
